

GELCOAT® MATERIAL GELCOAT MAT® MATERIAL

Our washbasins, shower basins and bathtubs are all manufactured with the use of a novel material. This material is an amalgam of a finely ground dolomite stone and a synthetic resin. We were among one of the first manufacturers in Poland to create our own **GELCOAT® MATERIAL** characterized with truly unique technological features. This material was created on the basis of a selected range of dolomite fractions and refining compounds.
