

SOLID® MATERIAL

This material is a uniform mass combining resins and aluminum oxide. One important extra feature of this material is that it is non-flammable. The **SOLID® MATERIAL** products have gained a high esteem both in Europe and the USA. This material is used by Marmorin for the production of washbasins, shower basins and washtubs. Thanks to its unique properties, the **SOLID® MATERIAL** is also widely used in public utility buildings and similar facilities.
